

Control4® T3 Series In-Wall Touch Screens

Control4 T3-7 7" In-Wall Touch Screen (C4-WALL7-BL, C4-WALL7-WH) Control4 T3-10 10" In-Wall Touch Screen (C4-WALL10-BL, C4-WALL10-WH)

The Control4 T3 Series In-Wall Touch Screens deliver always-on, dedicated control over all the technology in your home or business. Featuring gorgeous, low-profile designs with edge-to-edge glass and stunning, high-resolution graphics, these touch screens look amazing on any wall. All models include HD video intercom and crystal-clear audio intercom for convenient communications from room to room or with visitors at the front door.

- Available in 7" and 10" versions, the T3 Series In-Wall Touch Screens provide dedicated and elegant control of your home.
- HD camera combined with high-fidelity speakers and microphone provide the best intercom experience yet.
- Crisp picture with nearly twice the resolution of previous models.
- Extremely fast and responsive—up to 20 times faster than our previous touch screens.
- Compatible with virtually any new or existing home with options for power (AC or PoE) and network connectivity (Ethernet or WiFi).
- Video intercom integration with the following door stations and touch screens: Door Station (C4-DSC-EN-XX), T3 Series Portable Touch Screens (C4-TT7-xx and C4-TT10-xx), and legacy touch screens.
- Audio intercom integration with the following touch screens: T3 Series Portable Touch Screens (C4-TT7-xx and C4-TT10-xx) and legacy touch screens.
- Easy to upgrade—T3 Series In-Wall Touch Screens are compatible with legacy Control4 touch screen back boxes.
- Available in gloss white or black.

Control4® T3 Series Touch Screens

Model numbers	C4-TT7-BL, C4-TT7-WH, C4-TT10-BL, C4-TT10-WH
Features	
Screen	Resolution: 1280 × 800 Camera: 720p
Network	WiFi (802.11 b/g/n [2.4 GHz only]) wireless access point (WAP) already configured to communicate with a Control4 Controller. Wireless-N is recommended for Video Intercom. Notes: (1) Intercom usage. 802.11b is not recommended or supported for Video Intercom. (2) Wireless-N is recommended for Video Intercom. Even with Wireless-N, broadcasting to several devices will degrade Video Intercom response time and images. Broadcasting to additional devices will further degrade performance.
