

Jumbo, Jumbo Graphite™

An alternative to StarGlas, with maximum sizing up to 22'

KEY FEATURES & BENEFITS:

1. Extremely sturdy and rigid 2" thick acrylic substrate is shatterproof, making it safe for earthquake zones
2. Great for floor to ceiling applications in indoor and outdoor environments
3. Available in custom aspect ratios and sizes up to 22' in image width

Jumbo, Jumbo Graphite™

Jumbo, Jumbo Graphite is an extremely sturdy, rigid acrylic substrate that offers the benefits of StarGlas, but in sizes up to 22' (StarGlas' maximum is 17' wide). This high performance, rigid, rear projection screen that is capable of amazing versatility. 2" thick acrylic structure is shatter-proof, making it safe for use in earthquake zones. Ideal for indoor or outdoor applications, Jumbo, Jumbo Graphite produces incredibly sharp images with superior detail and contrast. Shown with Filmscreen 100, but available with any of Stewart's finely tuned rear projection materials.
