

Triad InCeiling Silver DT OpenRound

Grill Options

Triad's new dual channel ceiling speaker is as versatile as it is attractive. It's the perfect speaker for special installations such as hallways where it is desirable for each ceiling speaker to play both channels for uniform background coverage.

The InCeiling Silver DT OpenRound is also perfect for bathrooms, sitting rooms, etc., where there is only room for one speaker which will reproduce both stereo channels. In addition, the DT has switchable tweeter modes, making it either a dipole or bipole speaker, suitable for a variety of surround applications in smaller theater venues.

The grill is extremely designer-friendly, and does not use a bezel. The grill mounts securely with small magnets which hold it firmly in place, and the grill material is an attractive expanded metal which looks and sounds great. And you have a choice of either a round or a square grill.
